

POOJA CHINCHANSUR

Full-Stack Developer | Web and Mobile Applications | Application Security

Bangalore, Karnataka, India | +91 7619403443 | poojachinchansur3443@gmail.com
linkedin.com/in/pooja-chinchansur-44378222a | github.com/poojapc123 | poojapc123.github.io

PROFESSIONAL SUMMARY

Full-Stack Developer (M.Tech, Gold Medalist) with 1+ year of production experience across web, mobile and application security. Currently freelancing on a live ride-hailing platform: a NestJS + MongoDB + Redis REST API of 406 routes, two Next.js portals, and Flutter customer and driver apps. Delivers REST API design, role-based access control, payment gateway integration and measured performance work - 4.8x faster rendering, 92.6% smaller payloads - backed by OWASP Top 10 security testing and Linux server administration. Seeking a Full-Stack Software Engineer role.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, Dart, SQL, C++, HTML5, CSS3

Backend and APIs: Node.js, NestJS, Express, Flask, Spring Boot, REST API design, JWT authentication, role-based access control (RBAC), Mongoose ODM, WebSockets and Socket.IO, MVC architecture, Swagger and OpenAPI, Postman

Frontend and Mobile: React, Next.js, Ant Design, Bootstrap, SCSS, responsive design, server-side rendering; Flutter, Dart, GetX, cross-platform Android and iOS development, Firebase Cloud Messaging, push notifications, multi-language localization

Databases and Caching: MongoDB, MySQL, Redis, database and index design, aggregation pipelines, stored procedures, SQL and NoSQL query optimization

Cloud, DevOps and Integrations: AWS, Docker, Kubernetes, Nginx, PM2, Linux and Windows Server administration, CI/CD, Git and GitHub; Razorpay, Stripe, Cashfree, Twilio, Firebase, Google Maps Platform

Security and Practices: VAPT, OWASP Top 10, SQL Injection, XSS, CSRF, secure code review, rate limiting, security headers, TLS/SSL; Burp Suite, OWASP ZAP, Kali Linux, Nmap, Nessus, Splunk (SIEM), Wireshark; Agile and Scrum, SSDLC, unit testing

PROFESSIONAL EXPERIENCE

Freelance - Full-Stack Developer (Web and Mobile Applications)

Bangalore, India | Jul 2026 - Present

- Sole developer on a ride-hailing platform of five deployed applications on one backend - build features in NestJS and TypeScript across a 406-route API over MongoDB and Redis, including a notifications module and a location-aware home services endpoint for the customer app.
- Rebuild core Flutter customer-app screens - home, login, OTP verification, splash, services and notifications - with GetX controllers and bindings, reusable widgets and Figma design tokens, localized across 10 Indian languages.
- Cut response times in a measured performance pass: document rendering from 2.94s to 614ms (4.8x faster), the admin bookings payload from 10,503 to 779 bytes (92.6% smaller), timeouts added to all 26 previously unbounded outbound HTTP calls, plus gzip compression and MongoDB connection-pool tuning.
- Deliver API security and auditability: Helmet security headers, rate limiting on OTP and login routes, the JWT secret moved into environment configuration, an audit of all 406 endpoints closing unguarded routes, granular role-based access control, and a staff audit trail with before/after values and CSV export.

Gundal Business Private Limited - System Administrator (Full-Stack Web Developer Responsibilities)

Bangalore, India | Sep 2025 - Apr 2026

- Developed and maintained the company website (gundal.in) end to end - responsive HTML5, CSS3, JavaScript and Bootstrap front end wired to Python (Flask) REST services with request validation, structured error handling and JSON responses.
- Contributed as a core developer on the Matrix internal business application, owning assigned modules from requirement analysis through development, testing and release.
- Administered and secured servers, systems and databases - patching, scheduled backups with restore testing, uptime monitoring, role-based access policies and documented hardening baselines - and optimized SQL queries to cut load times.

C-DAC (Centre for Development of Advanced Computing) - Cybersecurity Intern

Bangalore, India | Sep 2024 - Feb 2025

- Performed end-to-end Web Application Vulnerability Assessment and Penetration Testing with Kali Linux, Burp Suite, OWASP ZAP, Nmap, Nessus and Nikto, identifying, exploiting and documenting OWASP Top 10 vulnerabilities including SQL Injection, XSS, CSRF and authentication flaws.
- Monitored security events in Splunk and OSSIM, ran digital forensics with Autopsy, FTK Imager and Wireshark, and produced reports with severity ratings, business impact and prioritized remediation.

Kalvium, Edubridge Learning and VK REVER - Software Engineering and Data Analytics Internships

Remote | Jan 2024 - Jun 2025

- Java and Spring Boot full-stack development with MySQL, REST APIs and role-based authentication (Edubridge, with Capgemini); Java, Python and C++ fundamentals at top proficiency (Kalvium); Power BI dashboards (VK REVER).

EDUCATION

M.Tech, Computer Science and Engineering - Sharnbasva University, Kalaburagi | 2022 - 2024 | Gold Medalist

B.Tech, Computer Science and Engineering - Sharnbasva University, Kalaburagi | 2019 - 2022 | 5th Rank

CERTIFICATIONS

- Advanced Certificate Course in Cyber Security (HPC), C-DAC Bangalore, 2025; Java Full Stack Developer, Edubridge Learning with Capgemini (Spring Boot, AWS), 2024; AWS Academy Graduate, Cloud Foundations, 2021

LANGUAGES

English, Hindi, Kannada (fluent); Telugu (conversational)
