POOJA CHINCHANSUR

Full-Stack Developer | Node.js (NestJS), Next.js, Flutter, MongoDB | Application Security

Bangalore, Karnataka, India | +91 7619403443 | poojachinchansur3443@gmail.com

linkedin.com/in/pooja-chinchansur-44378222a | github.com/poojapc123 | poojapc123.github.io

PROFESSIONAL SUMMARY

Full-Stack Developer (M.Tech, Gold Medalist) with 1+ year of experience building and securing production web and mobile systems. Backend owner and driver-app developer on a live ride-hailing platform: built its 406-route NestJS + MongoDB + Redis REST API and the Flutter driver app, and integrated the customer app and Next.js admin portal with the live API; both apps are on Google Play (10K+ and 1K+ downloads). Strong in REST API design, RBAC, payment gateway integration and measured performance and security work (4.8x faster rendering, 92.6% smaller payloads, OWASP Top 10 testing). Seeking a Full-Stack Software Engineer role.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, Dart, SQL, C++, HTML5, CSS3

Backend and APIs: Node.js, NestJS, Express, Flask, Spring Boot, REST API design, JWT authentication, role-based access control (RBAC), Mongoose, WebSockets (Socket.IO), payment webhooks, cron jobs, Puppeteer, Swagger/OpenAPI, Postman

Frontend and Mobile: React, Next.js, Ant Design, Bootstrap, SCSS, responsive design, server-side rendering; Flutter, Dart, GetX, Android and iOS builds, Firebase Cloud Messaging, push notifications, localization, Figma design-to-code

Databases and Caching: MongoDB, MySQL, Redis, schema and index design, aggregation pipelines, geospatial queries, query optimization

Cloud, DevOps and Integrations: AWS, Docker, Kubernetes, Linux and Windows Server administration, Apache, Nginx, PM2, CI/CD, Git, GitHub, Google Play Console; Razorpay, Stripe, Cashfree, Twilio, Firebase, Google Maps Platform, Anthropic Claude API

Security and Practices: VAPT, OWASP Top 10, SQL Injection, XSS, CSRF, secure code review, rate limiting, security headers, secrets management, TLS/SSL; Burp Suite, OWASP ZAP, Kali Linux, Nmap, Nessus, Splunk (SIEM), Wireshark; Agile/Scrum, SSDLC, unit testing

PROFESSIONAL EXPERIENCE

U-Trav (Freelance Contract) – Full-Stack Developer, Ride-Hailing Platform

Bangalore, India | Jul 2026 - Present

- Own the backend of a production platform - a 406-route NestJS/TypeScript REST API over MongoDB and Redis - and built the Flutter driver app end to end; integrated the customer app and the Next.js admin dashboard (front-end design by a teammate) with the live API.
- Built and launched U-Trav Driver on Google Play (10K+ downloads): 20+ screens from Figma with GetX in 10 languages, background ride-request and cancellation pushes over FCM, and regular signed releases; took the U-Trav rider app (1K+) live with backend, live tracking and SOS integration.
- Built features end to end: Driver Pass subscriptions (Razorpay, Cashfree and Stripe orders activated by payment webhook, admin-managed plans), outstation dispatch, SOS, and an AI support assistant on the Claude API grounded in admin FAQs and the driver's account state.
- Integrated a new customer app and a second NestJS service into production: split routes between the customer API and the shared booking API, deployed it behind Apache reverse proxy and PM2, and verified login, booking, dispatch, push and share-tracking on the live stack.
- Measured performance pass: PDF rendering 2.94 s to 614 ms (4.8x) with a shared headless Chrome pool, admin bookings payload 10,503 to 779 bytes (92.6%) with gzip, deadlines on all 26 outbound HTTP calls, exchange-rate caching with last-known-good fallback, MongoDB pool tuning.
- Hardened API security and auditability: Helmet headers, rate limiting on OTP and login, JWT secret in environment config, an access review of all 406 endpoints, and a staff audit trail with before/after values and CSV export.

Gundal Business Private Limited – System Administrator (Full-Stack Web Developer Responsibilities)

Bangalore, India | Sep 2025 - Apr 2026

- Developed and maintained the company website (gundal.in) end to end: responsive HTML5, CSS3, JavaScript and Bootstrap front end on Python (Flask) REST services with request validation and structured error handling.
- Administered and secured servers, systems and databases: patching, scheduled backups with restore testing, uptime monitoring, role-based access policies and hardening baselines; optimized SQL queries to cut page load times.

C-DAC (Centre for Development of Advanced Computing) – Cybersecurity Intern

Bangalore, India | Sep 2024 - Feb 2025

- Performed web application Vulnerability Assessment and Penetration Testing (VAPT) with Kali Linux, Burp Suite, OWASP ZAP, Nmap, Nessus and Nikto; found, exploited and documented OWASP Top 10 flaws (SQL Injection, XSS, CSRF, broken authentication).
- Monitored events in Splunk and OSSIM, ran forensics with Autopsy, FTK Imager and Wireshark, and wrote remediation reports.

Edubridge Learning (with Capgemini) – Java Full-Stack Developer Intern

Remote | Mar 2024 - Sep 2024

- Built full-stack web apps with HTML, CSS and JavaScript on Java/Spring Boot (MVC) and MySQL: REST APIs, login, session handling, RBAC, SQL tuning.

EDUCATION

M.Tech, Computer Science and Engineering - Sharnbasva University, Kalaburagi | 2022 - 2024 | Gold Medalist

B.Tech, Computer Science and Engineering - Sharnbasva University, Kalaburagi | 2019 - 2022 | 5th Rank

CERTIFICATIONS

- Advanced Certificate Course in Cyber Security (HPC), C-DAC Bangalore - 2025
- Java Full Stack Developer, Edubridge Learning with Capgemini (Spring Boot, AWS) - 2024
- AWS Academy Graduate, AWS Academy Cloud Foundations - 2021

LANGUAGES

English, Hindi, Kannada (fluent); Telugu (conversational)
